### **AP&T Gains International Peer Recognition Implementing Clean Energy Technologies**

*Employee-Owned Alaskan Utility Executes Extraordinary Shift in its  
Generation Portfolio Carbon Footprint.*

Port Townsend, Washington; March 16<sup>th</sup>, 2009 - In a transition some within the industry have called nothing short of amazing, Alaska Power & Telephone (AP&T), has become the envy of many of its peers. With energy costs a dinner table topic, current economic conditions have energy producers looking toward renewable and alternative energy as a practical economic strategy as our country moves forward.

**Prudent foresight and the commitment of AP&T's leadership and employee-owners to a renewable resource based generation strategy, have resulted in an energy portfolio shift that few (if any) other utilities can claim to have achieved. Since 1995, AP&T has transformed its energy production from 95% Carbon-Based, to 70% Renewable Resource-based generation.**

As noted on the cover of the enclosed 2009 spring edition of Energy International Quarterly (EIQ), **Alaska Power & Telephone Company** is pleased to have been acknowledged as a progressive leader among our innovative and forward-looking peers.

#### CONTACT

To request an interview with **Robert S. Grimm** to learn more about AP&T's ongoing projects and the Low-Impact certifications of its renewable resource based clean hydro generation, you may call **1-800-982-0136** or email [APT@APTalaska.com](mailto:APT@APTalaska.com)
