

Android Email Configuration

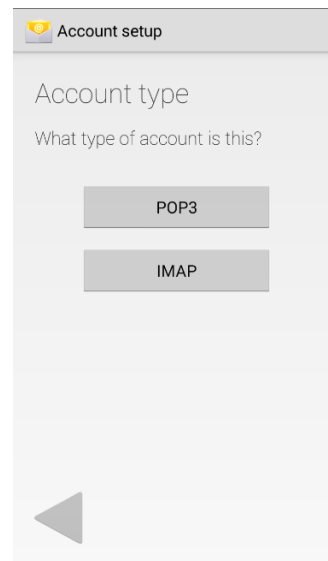

Learn how to add one or more of your email accounts in EMail on your Android phone or tablet. Configuration screens may vary by app. Additional assistance is available by contacting our 24/7 Help Desk toll-free at 1-866-793-4179.

Add an email account on your Android device

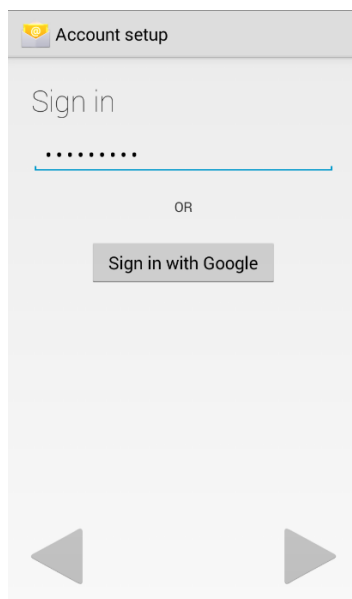

1. Open email app, enter your email address, then click next.

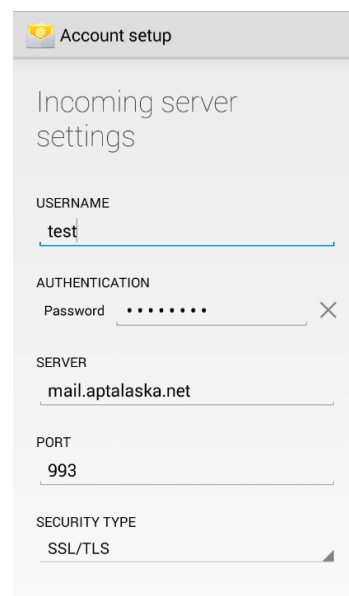

2. Select IMAP.

3. Enter your email password and click next.

4. Enter the Incoming Server Settings as shown. Click next.

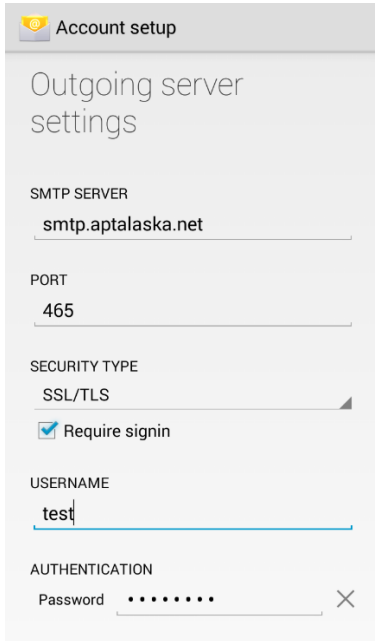

Note: User Name is NOT your full email address.

Android Email Configuration

5. Enter Outgoing Server Settings as shown.
Click Next.

6. Click Next through the remaining screens
until the app takes you to your Inbox.

The screenshot shows the 'Account setup' screen with the following fields and values:

- SMTP SERVER:** smtp.aptalaska.net
- PORT:** 465
- SECURITY TYPE:** SSL/TLS
- Require signin**
- USERNAME:** test
- AUTHENTICATION:** Password (masked with dots)

Note: User Name is NOT your full email address.
